NORFOLK WILDLIFE TRUST

Hello,

Welcome to your barn owl adoption with Norfolk Wildlife Trust! Your adoption supports our work creating a wilder Norfolk for the benefit of wildlife and people. Thank you.

With its heart shaped face, pure white feathers, and ghostly silent flight, the barn owl can be found flying low over fields and hedgerows at dawn and dusk. One of the things which amazes me most about barn owls is how their soft feathers allow them to fly silently, so they can listen out for the tiny sounds produced by their prey and approach them undetected. I hope with this adoption that you'll discover more about barn owls too.

Norfolk Wildlife Trust works to support barn owls and wildlife across Norfolk. Our management of wet grassland and fen provides habitat for barn owls where they can find the food and shelter they need to survive. Why not visit one of our nature reserves and you might be able to catch a glimpse of a barn owl? Our information guide shares some great places to visit as well as top tips on how to look and listen for barn owls.

I enjoyed creating your adoption welcome pack to thank you for supporting Norfolk's wildlife. There is a certificate to celebrate your support and a barn owl information guide to find out more about this magnificent bird of prey. You will also receive email updates throughout the year about barn owls, stories about our work, and how your adoption is making a difference.

Thank you for helping Norfolk's wildlife thrive.
I hope you enjoy your adoption!

Yours sincerely,

DGoodridge
