Habitat map

Map showing target note reference:

Habitat description:

**A. Dry acid grassland (B1) on top of the hill.**

The sward is mainly of common bent (*Agrostis capillaris*), Yorkshire fog (*Holcus lanatus*), and sheep's sorrel (*Rumex acetosella*), with a little early hair-grass (*Aira praecox*) and wavy hair-grass (*Deschampsia flexuosa*). Grazed very short by rabbits in swathes along the main paths on the top of the hill, but is longer in adjacent areas. The sward intergrades with gorse scrub (*Ulex europaeus*), plus some stunted bracken (*Pteridium aquilinum*) and bramble (*Rubus fruticosus* agg.).

**B. Bracken-dominated (C1)**

Tall herbs on the flanks to the east and north-east, with occasional trees – oak (*Quercus robur*), silver birch (*Betula pendula*), rowan (*Sorbus aucuparia*), sycamore (*Acer pseudoplatnus*) and shrubs of elder (*Sambucus nigra*), hawthorn (*Crataegus monogyna*), blackthorn (*Prunus spinosa*) and bramble with honeysuckle (*Lonicera periclymenum*).

**C. Gorse scrub with scattered trees and other shrubs (A2) on the flanks to the north and west.**

Dodder (*Cuscuta epithymum*), parasitic on the gorse, is a feature of this site, and occurs annually on scattered bushes. Heath bedstraw (*Galium saxatile*), sweet vernal grass (*Anthoxanthemum odoratum*), and foxgloves (*Digitalis purpurea*) are occasional amongst the scrub.

Dodder

**D. Semi-natural broadleaved woodland (A1.1)** on the flanks to the south and south-east.

Mainly of oak, silver birch, rowan, sycamore with occasional ash (*Fraxinus excelsior*), holm oak (*Quercus ilex*), Scots pine (*Pinus sylvestris*), sweet chestnut (*Castanea sativa*), downy birch (*Betula pubescens*). Trees are mainly low and scrubby, sometimes bare beneath, with some (artificially created?) bays or small glades by the circumnavigating path, and areas of wood sage (*Teucrium scorodonia*), broad buckler-fern (*Dryopteris dilatata*) and bluebells (*Hyacinthoides non-scripta*). By the east entrance gate are some mature-veteran oak trees.

English Oaks on east side of Incleborough Hill

South side of Incleborough Hill

**Other notable species:**

Non-noted on this survey for a species list please see end of document.

**Adjacent habitats/potential buffer zones & linkage to other sites:**

Caravan / camp site to the south and west; golf course to the north; agricultural land / pasture to the east.

**Is the site in positive conservation management?** Yes

Site is maintained by the National Trust, with scrub along paths and by seats cut back regularly.

Site has been grazed in the past.

**Brief management proposals:**

Continue to cut and clear scrub away from acid grassland areas.
